WELCOME TO AN EXCLUSIVE CIRCLE

Dear Shelby GT Owner:

Your new 1967 Shelby GT 350 or GT 500 has been designed and crafted to deliver the ultimate in performance, safety and comfort. We at Shelby American have built what we believe to be an automobile of unusual character . . . a car which will immediately earn your respect and which will prove increasingly pleasurable as the months and miles pass.

The character of the Shelby GT results from many race-proved engineering and design features incorporated in a basic vehicle of great reliability and comfort . . . the Ford Mustang. By understanding these engineering features, you will more readily appreciate your GT 350 or GT 500. That is the purpose of this manual. I urge you to read it carefully.

Owning a GT 350 or GT 500 should be a greatly rewarding experience. Your Shelby-American dealer shares this feeling. He stands with us in our mutual desire to have you enjoy your new car fully. Please feel free to consult him—or any of us at Shelby American—about any questions or suggestions you might have regarding your Shelby GT.

Please accept my thanks for your purchase—and my wish for your complete satisfaction with your new GT 350 or GT 500.

Cordially yours,

Carroll Shelby
